

I'm **Conner**, a **Texas**-based Software Engineer who strives to build and share great software with the world.

I specialize in Frontend but can double as Fullstack or a Technical Designer.

My philosophy for building software is beauty in simplicity whilst keeping chaos and complexity to a minimum.

I want your product or service to be renowned for its speed, simplicity, and ease of use.

Experience

Aug 2022 - Jun 2026

3.5 years
